Balances

The Face Sheet

- Share the resident's profile with other applications in an integrated system.
- Select frequently-used responses from your own "libraries".
- Scan and save electronic documents.
- Create your own reports of residents' face sheet details.

Physicians' Orders

- Paper-based Orders, MARs & TARs
 - Meds, Treatments, Routine, Standing, Diets & Labs
 - Print types of order (i.e. licensed meds) on separate administration sheets
- Electronic Medication Administration
 - Use bar code scanner to administer & check in meds
 - Track vitals, amounts, injection site & outcome
 - Be warned *immediately* about med allergies & drug interactions
 - Print drug monographs for more information

MDS Processing

- Complete and submit *all* assessment types.
- “Capture” ADL info through an interface to Resource Systems **CareTracker™**.
- Schedule MDS records that are due.
- Discover MDS records nearing a submission deadline.
- Use Logic Checking to look beyond CMS errors for responses that do not agree.

MDS 3.0 available by October 2010

MDS-based Reporting

- Automatic Triggers & RAPs calculation
- RAP Summary Completion
- Case Mix Scoring for Medicaid, Medicare and PPS-based commercial providers
- Quality Assurance and Indicators
- Unresolved Conditions from previous MDS
- CMS 802-Roster & 672-Census Survey
(Allows ongoing updates to current conditions to maintain accuracy between assessments)

Care Plans

- Add suggested problems based on triggered RAPs.
- Select frequently-used text from the Problem, Goal and Approach library.
- Use “I Care Plan” language for resident-centered care.
- Identify all goals nearing a target date.
- Use Monthly Evaluation to review goals and prepare for quarterly care plan.

Clinical Assessments

- Track Trends and Acuity of Conditions
- Define your assessment criteria or use areas provided by Hi-Tech
 - Risk for Falls
 - Bowel and Bladder Training
 - Contracture Risk
 - Risk for Dehydration
 - Nutritional Risk
 - Skin Risk

Progress, Nursing & RAP Notes

- Write stand-alone Notes or as you edit other parts of the residents' record:
 - Face Sheet
 - Activities and Events
 - RAP Summary
- Use text & templates from your Notes Library
- Sort by Discipline, i.e. Social Services or Nursing
- Lock a completed note so it cannot be changed.

Clinical Calendar

- Schedule labs, appointments, immunizations, activities, etc.
- Tag events that require acknowledgement.
- Track events until completion.
- Allow a completed event to trigger follow-up events.
- Print or display schedules for
 - Current day and week
 - Entire facility or specific resident
 - Types of events

And More...

- Resident Referral System
- CNA Flow Sheets
- Kardex—a 1-page snapshot of resident's needs & conditions
- Quality Assurance: MDS, Meds, Care Plans, and residents' weights
- Activities & Events tracking
- Therapy Tracking
